Date: Thursday, 13 June 2019 6:39:38 PM

Hi Alison,

The submission was made last Thursday.

We lodged through the online form. Might have been under my name? I remember the web site said that the auto reply wasn't working and to email to confirm that the submission had been received (just getting around to doing that now).

The submission was short and neither supports or opposes the activity.

I made a copy of the form before lodging it, which i have copied below.

Thanks

Murray England

Your Reasons

The reasons for making my submission are:
(state in summary the nature of your submission, giving reasons)

1. We are concerned about potential water quantity and water quality implications of the proposed activities that may result in adverse effects on the Selwyn District Council Community Water Supply Bore M36/7575 (Claremont).

2. Key concerns relate to:

a. The proposed activities occurring close to the groundwater levels in the area and the potential for any contaminants to enter groundwater and subsequently affect M36/7575.

b. Any potential well interference effects associated with taking and using water.

This submission neither supports or opposes the activity. The submitter seeks to ensure there is no compromise from both a water quality and quantity perspective to the Community Water Supply Bore M36/7575.

Consent
I wish the consent authority to make the following decision:
(give details, including the general nature of any conditions sought)

1. We seek that the consent authority ensures that there are no actual or potential adverse effects occur from the proposed activities on the Community Water Supply which abstracts water from bore M36/7575 (Claremont).

2. Any actual or potential adverse effect must be avoided, remedied or mitigated and that the outcome of there

being no adverse effects on the Community Water Supply are secured by conditions of consent, should consent for the activities be granted.

This submission neither supports or opposes the activity. The submitter seeks to ensure there is no compromise from both a water quality and quantity perspective to the Community Water Supply Bore M36/7575.

Hello Murray
No, I don't have a submission from SDC. Do you know when it was sent?

Regards
Alison
