

**Record Number** CRC102944  
**Record Type** New Consent  
**Permit Type** Discharge Permit  
**Record Holder** Canterbury Regional Council  
**Record Status** Issued - InActive

#### Location Various Locations, THROUGHOUT CANTERBURY

**Description** Discharge contaminants onto land in a river bed or lake bed, and onto land in circumstances which may result in that contaminant (or any other contaminant emanating as a result of natural processes from that contaminant) entering water.

**Trim File No** CO6C/31241

**Commencement Date** 24 Mar 2011  
**Lapses** 24 Mar 2016  
**Expires** 22 Mar 2026

#### Cond No Text

1 The discharge shall be only the following pesticides applied as pellets, or carrot or cereal bait for the control of rabbits, wallabies or possums:  
 1. sodium monofluoroacetate, referred to as 1080; or  
 2. 2-Pivalyl-1,3-Indandione, referred to as pindone.

2 The discharge of pesticides shall not occur on any land:  
 1. Administered by the Department of Conservation or otherwise owned by the Crown, except where that land is :  
 i. a public road which passes through private land; or  
 ii. along the margins of a water body; or  
 iii. the bed of a river or a lake; or  
 iv. located within the boundaries of private land.  
 2. zoned for residential purposes in a district plan.

3 The consent holder shall maintain and make available on the Canterbury Regional Council website an online interactive map at a scale that will allow the identification of all land which has been and may be subject to discharges permitted under this application.

4 1. The discharge of pesticides shall not occur on land without the written permission of the land occupier, or occupiers.  
 2. The consent holder shall retain a copy of the land occupier's permission for twelve months from receipt, and shall provide a copy within five working days to the Canterbury Regional Council, Attention: RMA Compliance and Enforcement Manager, upon request.  
 For the purposes of this condition the land occupier is defined as the person(s) living on that property who has the authority to grant permission, or where there is no-one living on the property, the owner(s) of the property or a duly authorised agent.

5 Apple shall not be used as bait.

6 Mixing, loading or temporary storage of pesticides shall not occur in a location where the pesticides may enter surface water or groundwater.

| 7  | There shall be no aerial discharge of pesticides which would result in pesticide baits being present on land within:                                                                                                          | <ol style="list-style-type: none"> <li>1. 100 metres of any dwelling or any hut used for public accommodation.</li> <li>2. 200 metres of any well used for a community drinking water supply;</li> <li>3. 400 metres upstream and 200 metres in any other direction, from an intake from a river used for community drinking water supply;</li> <li>4. 200 metres from the edge of a lake or reservoir used for a community drinking water supply;</li> <li>5. 50 metres of any well used for a domestic water supply;</li> <li>6. 200 metres upstream and 50 metres in any other direction, from an intake from a river used for a domestic water supply;</li> <li>7. 50 metres from the edge of a lake or reservoir used for a community drinking water supply;</li> <li>8. 10 metres of a formed public road;</li> <li>9. 20 metres of any flowing or standing water body that is: <ol style="list-style-type: none"> <li>i. in excess of three metres wide, or</li> <li>ii. less than three metres wide and visible from the air;</li> </ol> </li> <li>10. 20 metres of the boundary of the area of a discharge event.</li> </ol> <p>For the purposes of Conditions (7) and (10) a community drinking water supply is defined as a publicly or privately owned drinking water supply that serves 500 or more people at least 60 days of the year, but does not include a rural water scheme established solely to provide water for livestock.</p> |
| 8  | For all aerial discharge of pesticides, all practicable measures shall be undertaken to avoid discharging pesticides into a flowing or standing water body which is less than three metres wide and not visible from the air. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 9  | There shall be no discharge to water from the ground-based discharge of pesticides.                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 10 | There shall be no ground-based discharge of pesticides which would result in pesticide baits being present on land within:                                                                                                    | <ol style="list-style-type: none"> <li>1. 5 metres of any flowing or standing water body.</li> <li>2. 50 metres of any well used for a community drinking water supply;</li> <li>3. 50 metres, and extending 100 metres upstream, from an intake from a river used for community drinking water supply;</li> <li>4. 50 metres from the edge of a lake or reservoir used for a community drinking water supply;</li> <li>5. 20 metres of any well used for domestic water supply;</li> <li>6. 20 metres, and extending 50 metres upstream, from an intake from a river used for a domestic water supply;</li> <li>7. 20 metres from the edge of a lake or reservoir used for a domestic water supply.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 11 | There shall be no more than five aerial discharge events onto any area of land within the duration of the consent.                                                                                                            | notification                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

12

The person authorised to exercise this consent shall notify the following persons at least ten working days, but not more than two months, prior to the proposed discharge event:

1. all occupiers, owners and lawful administrators of all properties adjoining land onto which the discharge will occur;
2. all persons who hold authority to take water from a well or surface water intake located within the area of the proposed discharge event;
3. the RMA Compliance and Enforcement Manager at Canterbury Regional Council;
4. the owners of land in or adjacent to the bed of a river or a lake within the area of the proposed discharge event.

13

A notice required by Condition (12) shall include:

1. the approximate date on which the discharge is expected to commence, and the expected duration of the discharge event;
2. the name and nature of the substance to be discharged;
3. whether the discharge will be aerial or ground-based;
4. a description of the area over which the substance will be discharged, including a map showing:
  - i. the boundaries of the area of discharge;
  - ii. exclusion areas around water supply sources and water bodies; and
5. the name, address and contact phone number of the person authorised to exercise this consent.

- 14
1. At least two working days prior to the discharge, warning signs shall be erected at every place where people normally obtain access to the discharge area, or to public land adjoining the discharge area.
  2. The warning signs shall be repaired and/or replaced within 24 hours of discovery or notification of damage or theft.
  3. The signs shall state:
    - i. The nature of the operation;
    - ii. The pesticides to be applied;
    - iii. The bait the pesticides will be applied in;
    - iv. The date the pesticides are scheduled to be discharged;
    - v. A contact name and telephone number for enquiries.
  4. The signs shall:
    - i. Show the boundaries of the discharge area;
    - ii. Include advice warning the public not to take animals into the discharge area;
    - iii. Be capable of being read from a public area at a distance of at least five metres from the sign; and
    - iv. Include a description or photograph of the baits.
  5. The signs shall remain in place:
    - i. Until all poisoned bait and carcasses have completely broken down as demonstrated by bait and carcass monitoring; or
    - ii. For a minimum period of six months following every 1080 discharge event and eight months following every pindone discharge event;
- whichever is the longer period of time.

- 15
1. The person authorised to exercise the consent shall advertise its programme for an aerial discharge event in the public notices of the Christchurch Press and any other relevant local newspaper for that area at least 10 working days, but not more than two months, in advance of the aerial event.
  2. The advertisement shall identify:
    - i. the nature of the discharge event;
    - ii. the area of the discharge event;
    - iii. the type of pesticide to be used;
    - iv. the type of bait to be used, e.g. carrots, cereal;
    - v. the date(s) the poisoned baits are scheduled to be discharged; and
    - vi. a contact name and telephone number for enquiries.
  3. The RMA Compliance and Enforcement Manager at the Canterbury Regional Council shall be notified of the intended time and location of an aerial discharge event at least two working days prior to the event commencing.

## Consultation

16 Prior to any 1080 or pindone discharge event commencing on any land which is not private land, the Consent Holder shall notify the Papaitipu Runanga whose role it is, of the proposed operation at least 20 working days prior to the commencement of the discharge event.

| 30 | For any discharge of 1080 or pindone in a public area, the Consent Holder shall facilitate cultural monitoring by ensuring that: <ol style="list-style-type: none"> <li>Where requested by Te Runanga o Ngai Tahu or Papatipu Runanga, the Consent Holder shall provide an opportunity for a representative of the appropriate Papatipu Runanga to visit the discharge area after the aerial discharge of 1080 or pindone to view the result of the operation (referred to as 'cultural monitoring').</li> <li>A report on the cultural monitoring shall be provided to the Canterbury Regional Council upon request.</li> </ol>                                                                                                                                                                                                                                                                         |
| 31 | Representative samples of surface water shall be taken by an appropriately qualified person from a representative site or range of sites on one or more water bodies. These sites should be located where pesticides discharged within 200 metres of a domestic or community water supply may enter water. The sites shall be identified in consultation with the Canterbury Regional Council Director Investigations and Monitoring before a discharge event commences. Samples shall be taken at each site within: <ol style="list-style-type: none"> <li>4 to 8 hours after the discharge event has ceased; or</li> <li>As determined by the Medical Officer of Health. In the event that the Medical Officer of Health determines that no water sampling is required, then Condition (30) shall not apply in respect of 1080 discharges, but shall still apply for discharges of pindone.</li> </ol> |
| 32 | Water samples shall be analysed for the substance discharged, either sodium fluoroacetate (1080) or 2-Pivalyl-1,3-Indandione (pindone), using the most appropriate scientifically recognised and current method by a laboratory accredited for the method of analysis by International Accreditation New Zealand, or an equivalent authority.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 33 | A report that provides an analysis of the results of the water sampling undertaken in accordance with Condition (30) shall be provided to the Canterbury Regional Council, Attention: RMA Compliance and Enforcement Manager, within one month of the analyses being received by the Consent Holder. Where either sodium fluoroacetate (1080) or 2-Pivalyl-1,3-Indandione (pindone) is detected in the water samples the report shall explore the reasons for the presence of the substances in the water, and describe the steps the Consent Holder will take to reduce the risk of formulated substances entering water in future discharge events.                                                                                                                                                                                                                                                    |
| 34 | A Wildlife Monitoring Plan shall be prepared by the Consent Holder and shall be submitted to the Canterbury Regional Council, Attention: RMA Compliance and Enforcement Manager within six months of the consent being issued and prior to the consent being first exercised.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

35 The purpose of the Wildlife Monitoring Plan is to set out the methodology and processes to be used in a monitoring programme to assess adverse effects of 1080 or pindone discharges authorised by this consent on native birds and waterfowl, and the procedures to be following in the event of such effects being discovered. The Wildlife Monitoring Plan shall be prepared by a person or persons with relevant expertise in wildlife monitoring and impact assessment and shall include, but not be limited to:

1. Best practice guidelines or other procedures to be followed in the selection of the methodologies to be used in the monitoring programme.
2. Relevant linkages to complementary monitoring and research programmes undertaken by the Canterbury Regional Council or other Local Authorities, the Department of Conservation, the Ministry of Health, Crown Research Institutes, State Owned Enterprises or any other relevant organisations.
3. A requirement to carry out an appropriate level of baseline and impact monitoring within at least the first five years of the exercise of the consent, including, but not limited to, impact monitoring of a representative sample of discharge events in the following areas:
  - i. where a discharge area contains or adjoins a waterway, lake, wetland or riverbed; and
  - ii. where a discharge area contains, is within, or is immediately adjacent to, an area that has been identified as habitat of threatened native bird species.
4. Any procedures in addition to Condition (38) to be followed by the Consent Holder in the event of a discharge of 1080 or pindone causing any significant impact on native birds or waterfowl and steps to be taken to mitigate such effects during future discharge events.
5. A framework for reporting results to Canterbury Regional Council and other relevant organisations.

36 The consent holder shall forward a copy of any updated version of the Wildlife Monitoring Plan within 30 days of completing a review to the Canterbury Regional Council, Attention: RMA Compliance and Enforcement Manager.

37 A copy of the latest version of the Wildlife Monitoring Plan shall be held by the consent holder at all times.

38 Where a native bird or waterfowl death has occurred in the discharge area and is suspected to have been caused by 1080 or pindone poisoning, the carcass should be made available to the Consent Holder, and, if made available, the Consent Holder shall:

1. Have the carcass analysed for cause of death using the most appropriate scientifically recognised and current method by a laboratory that is certified for that method of analysis by an appropriate independent accreditation authority; and
2. Provide the results of the analysis to the landowner, Fish and Game New Zealand, Canterbury Conservancy Department of Conservation, Te Runanga o Ngai Tahu, and the Papatipu Runanga for that area within 10 working days of the receipt of results.

## reporting

39 The consent holder shall, by 30 October each year, provide the Canterbury Regional Council RMA Compliance and Enforcement Manager, with an annual report summarising all 1080 and pindone discharge events for the preceding year carried out under this consent. The report shall include:

1. The date and location of the 1080 and pindone discharge events.
2. The method and area of each discharge event.
3. The rate of application of 1080 or pindone for each discharge event.

## review

40 The Canterbury Regional Council may, once per year, on any of the last five working days of October, serve notice of its intention to review the conditions of this consent for the purposes of:

1. Dealing with any adverse effect on the environment which may arise from the exercise of this consent and which it is appropriate to deal with at a later stage; or
2. Requiring the adoption of the best practicable option to remove or reduce any adverse effect on the environment.

41 Advice Notes

1. The Consent Holder and all persons undertaking activities authorised by this consent are advised that the discharge of 1080 or pindone are subject to other regulatory requirements which may include, but are not necessarily limited to:
  - i. Hazardous Substances and New Organisms Act (HSNO) Act 1996;
  - ii. Hazardous Substances (Classes 6, 8 and 9 Controls) Regulations 2001;
