Description

Various Locations THROUGHOUT CANTERBURY

Location

throughout Canterbury

Various Locations.
there shall be no ground-based discharge of pesticides which would result in pesticide being present on land within:

7. 20 meters from the edge of a lake or reservoir used for a domestic water supply.
6. 20 meters and extending 20 meters upstream from an intake from a river used for a domestic water supply.
5. 50 meters from the edge of a lake or reservoir used for a community drinking water supply.
4. 50 meters and extending 50 meters upstream from an intake from a river used for a community drinking water supply.
3. 500 meters of any well used for a community drinking water supply.
2. 50 meters of any flowing or standing water body.
1. 10 meters of any flowing or standing water body.

There shall be no discharge into a river, the ground-based discharge of pesticides.

For all ground-based discharge of pesticides, all preventative measures shall be undertaken to avoid
A notice required by Condition (7) shall include:

1. The approximate date on which the discharge is expected to commence and the expected duration of the discharge event.
2. The name and nature of the substance to be discharged.
3. Whether the discharge will be aerial or ground-based.
4. A description of the area over which the substance will be discharged, including a map showing:
   1. The boundaries of the area of discharge;
   2. The name, address and contact phone number of the person authorized to exercise this consent;
   3. The name, address and contact phone number of the person(s) having control or supervision of the proposed discharge event;
   4. The purpose of the proposed discharge event;
   5. The area of the proposed discharge event;
   6. All occupants, owners and lawful administrators of all properties adjoinning land upon which the discharge event will occur.

The person authorized to exercise this consent shall notify the following persons at least ten working days, but not more than two months, prior to the proposed discharge event:

- Originator of the discharge;
- The MA Responsible Authority for the discharge;
Record Summary

1. At least two working days prior to the discharge, the person authorised to exercise the consent shall advertise its programme for an aerial discharge event in the public notices of the Christchurch Press and any other relevant local newspaper for that area at least 10 working days, but not more than two months, in advance of the event.

2. The person shall:
   i. The nature of the operation;
   ii. The boundaries of the discharge area;
   iii. The area of the discharge event;
   iv. The date and time of the discharge event;
   v. The type of pesticide to be used;
   vi. The type of bait to be used;
   vii. The purpose of the operation;
   viii. The name and position of the person authorised to exercise the consent;
   ix. The name and position of the person responsible for the operation;
   x. The person responsible for the operation;
   xi. The person responsible for the operation;

3. The person responsible for the operation shall:

General 16-Jan-2013
The purpose of the Operational Procedures Manual is to set out the procedures to be followed by the person(s) responsible for exercising this consent and to provide an overall framework for implementing and monitoring pesticide discharge consents under this consent. The Operational Procedures Manual shall include, but not be limited to:

1. The identification of potential discharge events, including the identification of hazards and the potential for adverse effects on human health, public health, and the environment.
2. The identification of potential discharge events, including the identification of hazards and the potential for adverse effects on human health, public health, and the environment.
3. The information to be provided to any person(s) affected by this consent, including the identification of hazards and the potential for adverse effects on human health, public health, and the environment.
4. The identification of potential discharge events, including the identification of hazards and the potential for adverse effects on human health, public health, and the environment.
5. The identification of potential discharge events, including the identification of hazards and the potential for adverse effects on human health, public health, and the environment.
6. The identification of potential discharge events, including the identification of hazards and the potential for adverse effects on human health, public health, and the environment.
7. The identification of potential discharge events, including the identification of hazards and the potential for adverse effects on human health, public health, and the environment.
8. The identification of potential discharge events, including the identification of hazards and the potential for adverse effects on human health, public health, and the environment.
9. The identification of potential discharge events, including the identification of hazards and the potential for adverse effects on human health, public health, and the environment.

Within 30 days of any update to the Operational Procedures Manual, the consent holder shall forward a copy of the updated version to the Canterbury Regional Council Attention: RMA Compliance and Enforcement Manager.
Representative samples of surface water shall be taken by an appropriately qualified person from a representative site or range of sites on one or more water bodies. The sites shall be located where pesticides discharged within 200 metres of a domestic or community water supply may enter the water. The sites shall be identified in consultation with the Canterbury Regional Council. Samples shall be taken at each site within 24 hours of the discharge event commencing. Samples shall be taken at each site within 24 hours after the discharge event has ceased, or if the Health Department determines that water quality in the event that the Medical Officer of Health determines that water quality is not at an acceptable level, then the Condition (3) shall not apply in respect of 1080 discharge, but shall apply for discharges of phosgene.

Water samples shall be analysed for the substances discharged: either sodium fluoride (1080) or 2-Pyridyl-1,3-indole (phosgene) using the method of analysis approved by the Regional Officer, either being the method of analysis approved by the Regional Officer, or an equivalent method as approved by the Regional Officer, or an equivalent authority.

A report that provides an analysis of the results of the water sampling undertaken in accordance with Condition (3) shall be provided to the Compliance Manager within one month of the analysis. Where the analysis indicates the presence of the substances in the water, the Regional Officer shall require the holder to take steps to reduce the risk of the substances entering water in discharge events.

A Wildlife Monitoring Plan shall be prepared by the holder and shall be submitted to the Canterbury Regional Council. The Compliance Manager within six months of the consent being issued and prior to the consent being first exercised.
The purpose of the Wildlife Monitoring Plan is to set out the methodology and processes to be used in a monitoring program to assess the effectiveness of the Regional Council's actions to control the spread of the species within its area of jurisdiction.
1. The Consent Holder and all persons undertaking activities authorised by this consent are advised that the discharge of 1,060 or 1,000 ppm sodium fluoride is subject to other regulatory requirements which may include, but are not necessarily limited to:

- Health and Safety at Work Act 1974
- Control of Substances Hazardous to Health Regulations 1994
- Control of Pesticides Regulations 1986

2. This consent is issued under the Resource Management Act 1991 and does not remove the need to comply with all other applicable laws (including the Resource Management Act), regulations, Bylaws, and rules of law. Note that this consent does not give the right to enter onto or above private land to exercise the consent.
