Dear Brett Aldridge

Re Variation 1

Please don't stop the water race down strangers Road as this is most important for my stock as well as the environment & domestic native animals & fire risk. use.

If CPW bring their pipe I do not want to sell any of my land.

If the pipe comes thru I will require three one inch pipes for my stock. I have a well & consent but it goes dry in the summer because of all the ivriagation.

I think you should be putting
in rain water storage tanks
for emergency water.

I can not store water in
case of fire because my
water tank has split
~~test~~ because of the
earthquake

This is a bad situation
in the summer if the well
goes dry again & your
tank is split.

I hope your organized.

Yours faithfully
