State concisely whether you support or oppose the provision being submitted on, or wish to have amendments made.

My submission is that: Oppose

Please state your reasons for supporting/opposing/amendments sought

My reason(s) for supporting, opposing or requesting amendments to this specific provision are:

I oppose section 11.5.8 and 11.5.9 we live and farm in this area, why are we imposed with such a tight time frame compared with everybody else. All these will change our farming practices as we will have to go more intensive to try and recuperate some money to pay the high costs and time these regulations will impose on us. Why has nobody actually come and looked and discussed our land and its current state. WE don't want all our land just lumped into a Cultural sensitive zone.

Why is our nitrogen level so low compared with other areas. where these areas prone to a lot of leaching.

Please give precise details for each provision. The more specific you can be the easier it will be for the Council to understand the outcome you are seeking.

I seek the following decisions from Environment Canterbury:

I want the nitrogen loss calculator on par with other areas

The time frame extended out to match other areas instead of 1 jan 2017 as we haven't even seen overseer program yet, we don't want our catchment area described as a restricted discretionary activity and the conditions imposed with it.

We want our area properly looked at and the Cultural sensitive zone reassessed and explained why all of Kaitoretie spit is lumped in this zone. Then you might see why Schedule 24 is so impracticable. Surely some of this area must drain toward the sea.

We need points 11.5 .8 and 11.5 .9 dates extended and totally reassessed.

We support Federated Farmers Submission.
