State concisely whether you support or oppose the provision being submitted on, or wish to have amendments made.

My submission is that: Oppose

Please state your reasons for supporting/opposing/amendments sought

My reason(s) for supporting, opposing or requesting amendments to this specific provision are:

This amendment is completely impractical. Drainage from land including farmland can consist of many very small ditches (cms across) running through paddocks - each one of these can not be consented. Firstly, not only would the cost be astronomical but secondly the exact location of small drainage ditches is determined by the flooding event as it is happening. That is, it is impossible to know and therefore consent for small (sometimes only spade width) drains. Please note that for many of these ditches or swales they will only have water in them for a short period of the year; most of the time they are empty.

Please give precise details for each provision. The more specific you can be the easier it will be for the Council to understand the outcome you are seeking.

I seek the following decisions from Environment Canterbury:

Precise definition of drain required.... needs to be practical.

State concisely whether you support or oppose the provision being submitted on, or wish to have amendments made.

My submission is that: Oppose

Please state your reasons for supporting/opposing/amendments sought

My reason(s) for supporting, opposing or requesting amendments to this specific provision are:

D. Re. excluding stock from drains. What is the definition of a drain? Small channels are dug across paddocks to aid in removal of water for the occasional times that flooding occurs. These channels are part of the paddock and for the majority of the year they are dry and stock walk on and eat grass growing in them.

Please give precise details for each provision. The more specific you can be the easier it will be for the Council to understand the outcome you are seeking.

I seek the following decisions from Environment Canterbury:

D is impractical

State concisely whether you support or oppose the provision being submitted on, or wish to have amendments made.

My submission is that: Oppose

Please state your reasons for supporting/opposing/amendments sought

My reason(s) for supporting, opposing or requesting amendments to this specific provision are:

The flow of the Halswell River appears to be increasing not decreasing. More investigation into flow levels needs to be conducted.

Please give precise details for each provision. The more specific you can be the easier it will be for the Council to understand the outcome you are seeking.

I seek the following decisions from Environment Canterbury:

More investigation required.
