State concisely whether you support or oppose the provision being submitted on, or wish to have amendments made.

My submission is that: Oppose

Please state your reasons for supporting/opposing/amendments sought

My reason(s) for supporting, opposing or requesting amendments to this specific provision are:

(d) needs to clarify that those with higher N leaching are required to make the first and largest reduction to achieve this outcome.

There is no acknowledgement that there is little current science and management techniques to achieve this outcome without significant drop in income for the farmer.

How did Mayfield Hinds irrigation scheme members obtain consent for N rate of 80kg/ha/yr. Will this be reduced by 45% in time?

Please give precise details for each provision. The more specific you can be the easier it will be for the Council to understand the outcome you are seeking.

I seek the following decisions from Environment Canterbury:

To better define how this outcome can be achieved.

My submission is that: Support

Please state your reasons for supporting/opposing/amendments sought

My reason(s) for supporting, opposing or requesting amendments to this specific provision are:

I support a total limit approach (but at what level?) and that some land intensification is allowed.

Please give precise details for each provision. The more specific you can be the easier it will be for the Council to understand the outcome you are seeking.

I seek the following decisions from Environment Canterbury:

Nothing required.

My submission is that: Oppose

Please state your reasons for supporting/opposing/amendments sought

My reason(s) for supporting, opposing or requesting amendments to this specific provision are:

The limit of 20kg/ha/yr restricts any ability to irrigated (new) area and allow profitable management of that area.

Please give precise details for each provision. The more specific you can be the easier it will be for the Council to understand the outcome you are seeking.

I seek the following decisions from Environment Canterbury:

Acknowledge that irrigation area requires higher level of intensification.
