Subject: Submission on Proposed Canterbury Air Regional Plan
Date: Sunday, 8 March 2015 5:58:15 p.m.

Hello, I am making the following submission on the PCARP, in particular section 6.32.

I think it is very positive that ECan is now allowing ultra low emission woodburners to be installed in new homes in Christchurch. I fully support this change to the air plan and am very happy with the outcome it will achieve- warmer, healthier homes in Christchurch.

Regards,
