(3) I seek the following decisions from Environment Canterbury: (Please give precise details for each provision. The more specific you can be the easier it will be for the Council to understand your concerns.)
Christchurch clean Air Zone Pages 4(62) to (65) Option 3	I oppose prohibition of woodburners especially in low income homes but support installing technology to make them more efficient. I am worried because my ecan woodburner is my only form of heating but it has only ever had white smoke then fades away after its burning. I am ^{in low income bracket} in low income bracket and work 2 jobs to pay rates, mortgage etc. Can't afford loan on new woodburner or increase in electricity. (Power bill increase of \$20 this year was large enough). I have a convectional diy solar to keep costs down and don't turn many lights on at night. Don't drive a car. Get home at 6:30pm or 7pm so fire is not going for long. Have roof insulation. I need my burner to stay well. Earthquakes	The report clearly wants targets met. Perhaps provisions for flexibility would be prudent as we cannot predict weather patterns anymore or even nature's violent shakes. I appreciate all the hard work scientists, economists, ecan staff etc put into solutions and thank you very much for reading my submission and for the bus that allowed me to travel to your office to collect this form. Sorry to sound pathetic but at 59 I just state how things are. taught me this! 3/3/15.
