**Subject:** Canterbury Air Regional Plan ( Proposed Air Plan )

Branscombe Trust (Jennifer Elizabeth Sullivan and Marked Nominees Limited ) gives notice that it objects to the plan referred above.

The objectors own a house at 7 Branscombe St Timaru 7910 that was constructed in or about 1889 ( now over 125 years of age )

It has 3 fireplaces.

It has 6 bedrooms.

The principal fireplace in the living room is a core heater to the house.

With the style of house this fireplace in particular does not readily or easily convert to alternatives

In storms or when power is down it is or can be a life saver.

It is a coal burner and while it can burn wood it is at its effective best is the use of coal.

This is the only fireplace currently used- the others have not been used for over 20 years.

The fireplace surrounds are a feature. It is consistent with the age of the house.

The chimney sweep who cleans it every year is impressed by the lack of soot he collects.

An exemption is sort from the Canterbury Air Regional Plan in respect of these premises.

An inspection will be available if required.

Yours Faithfully

Jennifer Elizabeth Sullivan
