Hi Team

Can you please TRIM and Workflow this submission.

Kind regards

Kiri

Subject: Submission on Air Regional Plan

Dear Sir or Madam

Could you please send this to who ever looks after Submissions.

Thanks.

Regards Morris Harris
Form 5
Submission on publicly notified proposal for policy statement or plan

Clause 6 of First Schedule, Resource Management Act 1991

To Canterbury Regional Council

Name of submitter: Morris Harris

This is a submission on Proposed Canterbury Air Regional Plan

The specific provisions of the proposal that my submission relates to are:

Outdoor burning in Rural Areas and Clean Air Zone 2 areas, in particular Rule 7.10 (8); within a clean air zone burning shall not take place during May, June, July or August.

My submission is:

- I oppose the prohibition on outdoor burning in the clean air 2 zone during the months of May, June, July and August
- The clean air 2 zone to the west of Rangiora is Rural Zoned land under the Waimakariri District Plan. The prohibition during the above months will be prohibitive to normal farming practices, and prevent practices that have been carried out for over 100 years.
- The District has promoted 4ha as rural, and therefore rural activities are anticipated to occur, including disposing of hedge and shelter trimmings, gorse control, firewood harvesting, clearing wind damage and managing crop residue; practices that commonly include burning as an accepted practice for good stock management, clean wool and control of rodents and fire risk. For example; macrocarpa hedge trimmings or windblown debris are poisonous to stock and can cause spontaneous abortion; gorse once used as hedging, is required to be controlled as a weed pest and essential for clean wool production; windblown tree debris and trimmings left unattended create breeding grounds for rodents and pests and create a fire hazard during summer months (when local council fire restrictions are usually in place).
- The clean air 2 zone on the western side of Rangiora enjoys a predominantly easterly wind, carrying any smoke from outdoor burnings away from urban areas.
- The WDC summer Fire ban has just been lifted on the 18th April 2015, having been imposed in December (an annual occurrence). This allows 12 days to burn the summer and autumn organic material, and will force unsafe practices in order to accomplish the task in such a tight time frame.
- The beneficiaries of the prohibition are residential properties in Rangiora. The proposed plan notes at Page 4 that home heating is the predominant source of contaminants that exceed guidelines – not outdoor burning in neighbouring rural areas.
• The other rules controlling outdoor burning are tenable and would control effects to a more than minor level, especially given the predominant wind direction for the clean air 2 zone on the western side of Rangiora.

I seek the following decision from the local authority:

• Delete the rule 7.10(8) prohibiting outdoor burning during May, June, July and August.

• Alternatively, a permitted rule could be introduced for the specified months allowing outdoor burning in the rural zoned areas of the CAZ2 to the west of Rangiora, between 8am and say 2pm, allowing time for smoke to disperse in the predominantly easterly daytime wind.

• Failing deleting the prohibition or the permitted activity status controlling times for burning during those months, a rubbish collection for organic material should be funded through the Regional Rate paid by those in the urban areas benefiting from the rural restrictions. Those within the rural zone of the CAZ2 are currently being subjected to restrictions that are costly (rubbish bags and transfer station fees and petrol or the cost of resource consent) and of no direct benefit. Those benefiting directly live within the urban zone of the CAZ1; it should be from their regional rate levy that an organic rubbish collection is funded.

I wish to be heard in support of my submission.
