Support Oppose

Supports in Part or Opposes in Part

State concisely whether you support or oppose the provision being submitted on, or wish to have amendments made.

My submission is that: Support Oppose

Please state your reasons for supporting/opposing/amendments sought

My reason(s) for supporting, opposing or requesting amendments to this specific provision are:

I wish to oppose Part 1 (Installation) of Schedule 7 (Installation, registration and maintenance of domestic solid fuel burners).

1) Though the discharge of combustion from a solid fuel burner is under the control of Environment Canterbury via the Resource Management Act. The installation of the appliance is classed as building work and hence falls under the Building Act 2004. Thus a building consent is required for the installation (building work) of a new or change to an existing solid fuel heater installation. The purpose of the Building Act was to ensure uniformity and consistence of building work thought New Zealand. The Building Act 2004 and Plumbers, Gasfitter and Drain layers Act 2006 deal with persons who are licensed to perform building work. By invoking part 1 of Schedule 7 Environment Canterbury is regulating an industry to perform building work which is already suitability controlled and regulated. Schedule 7 part

1) It flies against the face of the entire purpose of the Building Act. I believe it is out of Environment Canterbury's remit to regulate who can or cannot install solid fuel heating appliances. Builders and home owners can install solid fuel heaters under New Zealand law. Part 1 of Schedule 7 does not take in consideration of those persons or any other who are qualified and/or experienced to perform that work who are not members of the Home Heating Association nor the owner/builders provisions of the Building Act. Certifying and licence plumbers are the only persons who are licensed and qualified to do the complete installation of solid fuel burners particularly when there is a wet back associated with the installation. Part 1 of Schedule 7 does not permit these suitably qualified and licensed persons from performing building work.

2) I am a Certified Plumber and have been one for many years. I have installed log fires for over 20 years, including log fires with and without wet backs. I pay annual fees to the Plumbers, Gasfitters and Drain layers Board. I am not a member of the Home Heating Association and do not wish to become a member. As I see it to become a member does not give me any more benefits or rights that I have currently got. I feel that the Home Heating Association that does not represent all competent installers. There will always be good installers and bad installers no matter what you do.

3) I do not believe that members of the Home Heating Association perform the task of installation of a solid fuel heating appliance any better or worse than any other group or individual of the community. It is my belief that no matter which group or group of individuals who install solid fuel heating appliances their actions will not change (or have an adverse effect of) the discharge to the environment from a correctly installed and compliant solid fuel heating appliance.

4) Part 1 of Schedule 7 will prevent those who perform the task of installing solid fuel heaters (including those who work inside and out of the Environment Canterbury area) who are not members of the Home Heating Association from working in the Canterbury Region

5) There is no advantage to having members of the Home Heating Association strictly performing the installation of solid fuel heater installations. Particularly when those members who are not (or do not have on staff) certifying plumbers to complete the installation of wet backs

6) It appears or can be perceived that Environment Canterbury has come to a suitable arrangement which financially benefits a single group of the community and excludes others including the rate payer.

Please give precise details for each provision. The more specific you can be the easier it will be for the Council to understand the outcome you are seeking.

I seek the following decisions from Environment Canterbury:

I seek that Environment Canterbury removes Part 1 of Schedule 7 in its entirety from the Proposed Canterbury Air Regional Plan.
