Your submission The environment and its care is very important to me. On my small piece of land I consider how to best look after it. How to use it to produce food. I chose to live a clean simple life and want to be able to do that by being more self sufficient with heating as well.	What do you want Environment Canterbury to do? I ask that Environment Canterbury allow <u>all</u> responsible adults to be able to make and chose how they wish to heat their homes. All areas of Christchurch to have this choice. Wood fires produced by local manufacturers - stoves are built with clean air burning and ultra low emissions. Further details available on their website.
