Waterway management
ur submission

What do you want Environment Canterbury to do?

At present farming practice is to fence roadside boundaries up to bridges - denying public access to rivers. Fencing of farm river boundaries at the Queens chain^{will} allow public access (which is their right) so as to monitor the health of the ecosystem of their waterway. The rivers are not the property of the adjoining

Continued on next page

Continued on next page

To enforce fencing of farm, river boundaries at Queens chain, allowing public access to riverbanks for recreational ~~and~~ purpose and to enable monitoring of the ecological health of waterways.

To encourage free camping in these areas as a means of monitoring their ecological health — is the river drinkable? swimmable? and also as the birthright of NZ children to camp by a river.

Wood burners

It is wrong to have a 15 year limit on use of wood burners.

This means wood burning is available only to the rich, who can afford to write off a big outlay. It is illogical to say that the age of a machine (rather than its hours of use) is relevant to its efficiency.

It is environmentally wrong to junk already existing infrastructure.

~~It is wrong to take away the human right to fire.~~

What do you want Environment Canterbury to do?

Have a fair wood burning policy that does not discriminate against poorer people -

Put research into discovering the most efficient, long lasting ~~wood burner~~ cheapest woodburner - ~~so that~~ ^{and} allow it to become available for all.

~~Spent~~ Encourage research into 'refits' of existing woodburners so as to make them more efficient allow for 'refits' of existing woodburners.

make cycle helmets voluntary

Continue your submission on additional pages if necessary.
