Your submission

What do you want Environment Canterbury to do?

1) We have a low emission log burner, however our particular log burner isn't now on the list of "Scan approved" log burners. Will the number of "Scan approved" log burners grow? Why are the new log burners so expensive?

2) We have 2 heat pumps

Extend the number of log burners that are affordable!

Your submission	What do you want Environment Canterbury to do?
but rarely use them, only in middle of winter, because of the cost of running them. Our log burner heats the entire house whereas the heatpumps don't.	Power prices keep rising & so do our rates including Ecan rates. How does this correlate? Why would we use our heatpumps if the above keep rising
3.) The company I am employed with are moving back into the city, planned for 2017. I want to know why I would use a bus to get me home in an emergency rather than the reliability of using my own car.	more efficient city to suburbs bus service, why would I take 2 buses to get me 2 + from the city when my own car can get me home in 20 minutes?
4.) Went for my once yearly bike ride around city recently. The Avon river is appalling. Doesn't flow like it used to be is dirty.	Given the Avon was once a beautiful attraction, is it going to be dredged?

Continue your submission on additional pages if necessary.
