What do you want Environment Canterbury to do?

P 12.

Good use of funds to focus more on natural corridors and connected habitats - what does this mean?

Banks Peninsula is a large area with considerable biodiversity value. Over the years I have

PTO.

Ecan to work with agencies and organisations to achieve as many areas of significant indigenous vegetation under some form of management. This will require funding to organisations etc to achieve the goal.

Success needs to be driven

been involved in a vast range of issues involving the identification and protection and management of biodiversity. At this time the Christchurch City Council is identifying significant ecological sites on Banks Peninsula with landowners. This has been a very slow process and we will be looking at an increase in the number of areas requiring management and protection. Over the years there has been increasing opportunities to work together Ecan and the Christchurch City Council and landowners.	
Since the earthquakes and the size of the Zone Committees there has been less focus on biodiversity. We need to see programmes to keep community interest, improve knowledge and understanding.	
Organisation involved with - Banks Peninsula Conservation Trust, BP Pest Liaison Committee, ECC Ecological Steady Group, North Canterbury Federated Farmers and a number of working groups around the Canterbury Breeding Strategy.
