Your submission

1. Because the development of Christchurch, the suburbs are extending far more than before and more and more population moving to the west after the earthquakes. It is obviously the plant Ravensdown in Hornby does not meet the standard, the smell/air pollution of chemical is very strong and unpleasant. I know people get itchy eyes, breathing problems, nausea .. etc. It's not good to keep this kind of plant in the area to affect our health.

2. I can not enjoy outdoor activities on my garden due to the smell of chemical from Ravensdown, I also need to close windows at home too.

3. The smell of chemical from Ravensdown is so strong, you can easily smell it from roundabout of Main South Rd to Hornby Hub Mall. I hate to drive through there.

4. Ravensdown in the area devalues my property. I know some people would not buy the house in Hornby because of the pollution from this plant.

What do you want Environment Canterbury to do?

Move the plant out of the area.
Please concern about our health and our right.
