Water Management

We would like very strong controls of water management; in particular stopping, not just discouraging farmers discharging nutrients into our waterways and keeping water usage to levels that maintain or improve the quality of our rivers. We value our water very highly .

Natural Habitats:

Ensure natural habitats are protected, and where possible enhanced,  
Focus on restoring waterway corridors and other habitats that provide stepping stones for wildlife

Transport:

We would like to see steps taken to increase Christchurch bus patronage especially with regard to meeting the needs of an ageing population.  
We support local rail from satellite towns where there are existing tracks.

Cleaner Air:

Continue with initiatives that create improved burning and reduce smoke emissions from domestic fires. This would include replacing old heating appliances with more efficient ones.  
Help people to change to cleaner heating including teaching them that heat pumps are as good as a heater or burner with a glow.

Setting the Rules:

Take stronger action on those who infringe the rules.

Regional Leadership:

Bring back a totally democratically elected regional council ASAP.

What do you want Environment  
Canterbury to do?

As above
