#### Your submission

1. We need to return Ecan to public governance as soon as possible
2. Catch a bus – this MUST be co-ordinated with Christchurch City Council and focus on Biking as well as busing as a way to address congestion, public health and safety and lower our carbon footprint. Our buses already provide a connection with cycling by providing bike carriers, this needs to be promoted and supported.
3. Water quality
  - we have fantastic drinking water in Christchurch city, we must maintain it
  - improving waterways is a high priority including addressing issues caused by earthquakes.
  - rural waterways – yes to supporting farmers to address this, but important that they pay their share of this, and not get a free ride. Where they are polluting them and profiting from this, they must be held accountable.
4. Biodiversity – this is easily forgotten amongst the other critical issues we face, but we are at a stage where we must act to protect and extend what is left before we have lost too much. Supporting things like Colin Merk's walkway around Christchurch is a good step in this direction

What do you want Environment Canterbury to do?

1. return to elected council as a priority
2. Memorandum of understand with the CCC to promote

buses and cycleways

3. Commitment to supporting biodiversity in the region as a priority, and supporting projects already addressing this such as the Merk walkway
  4. Show leadership in acting on behalf of our environment
-
