Your submission Hello  
My submission is regarding cleaner air quality.  
As a long term inner city residents enjoying the comfort my log burner,s has given us for over 25 years we have seen a substantial decrease in the number of chimneys around our neighbourhood and think that the need for funding for those in hardship to change their form of heating is coming to an end.  
Better regulation of fire wood dryness would reduce smoke emission.  
Another study of the now lower smog density and its relevance to the populations health.

What do you want Environment Canterbury to do? License firewood merchants.  
Have a scientific study made as to the effect lower air pollution levels have had on peoples health.
