Your submission I believe it is good to increase the quality of the air,water and enviroment but that comes at great cost to households, business and the community where inflation and wage growth are low but councils around the country have ideals that we cannot afford.Air quality has improved a huge amount in Canterbury thanks to the Earthquake in the form of chimney falling down not because of Ecan. Leave the good people of Canterbury alone we have all had enough grief without more crap from another goverment dept spending our money on things we dont all agree with.

What do you want Environment Canterbury to do? Do what you can to help but keep the cost to people to a minimum .Let people be warm during the winter months instead of making them feel like criminals and push for ECan to become a democracy so the people that pay for it all have a say!!!!!!!!!!!!!!!!!!!!
