I do not wish my contact details to be made public

All submissions are public documents. Copies will be published on the Environment Canterbury website.

Your submission	What do you want Environment Canterbury to do?
* Any consents regarding activities which have water and air issues must be linked to local council.	* Whole approach to consent process - if land consent (to local council) has air and water issues then both local council and ECAN should hear it together.
* Accurate investigation into resource consent applications	
* Awareness of private bore and intensive farming degradation potential.	* Who will be held accountable for our loss of water, our decline in quality.

Submission form continued

Submissions close at 5pm on Monday April 13, 2015.

You may send your submission:

By mail (no stamp required): Freepost 1201, Environment Canterbury, PO Box 345, CHRISTCHURCH 8140

Online: Use the online form provided on our website www.ecan.govt.nz/plans. Follow the instructions provided

By email: ecinfo@ecan.govt.nz. Ensure your full name and address is included

* To keep fern land for farming not gravel excavation

Continued from previous page.

Your submission

* River / Aquifer degradation.
* Water Management Document sounds/reads as a fine start - make those aims actually happen.

* Mixed Management for ECAN - locals and professionals.

* Consider environment before granting consents. Just because dairying is the current trend is it really sustainable into the future? What are the opportunity costs to the rest of the environment/people?

* To make contractors use river beds - remove gravel build up rather than cheaper land excavation
What do you want Environment Canterbury to do?

* Actually prosecute to the full letter of the law.

* To do this, more field officers on the ground (less in management/executive pay structure).

* Elect some representatives from local stakeholders but keep professional and neutral core.

* Decide long term benefits for all people. Once the environment suffers, what are we left with. - put environment back into ECAN.
