| Your submission | <p>Re: Cleaner Air</p> <p>I think the statement on page 16: 'And when a burner is 15 years old, it must be replaced by a cleaner-burning one' should be taken out of this document. Three years ago we purchased a clean burning, new wood fire. How do you know that any technology will have changed in 15 years? By putting this statement in your document and plan, you are assuming that there will have been advancements made in the wood burner technology.</p> |
| What do you want Environment Canterbury to do? | <p>In 15 years, our fire may be just as efficient as the ones being produced and the only thing you will have achieved is costing us another \$3,000 to replace a perfectly good wood burner. Please do not include statements in your plan that are ambiguous, as they could have a detrimental affect on the financial future of Canterbury residents.</p> |
