Your submission	My submission is around the Rebuild and Transport, plus compliance and zoning.

What do you want Environment Canterbury to do?

I think its a great idea to focus on the rebuild of the city, though City Council and CERA have kinda usurped the role of ECAN in this respect they are things proposed such as mobility and transport in the rebuild which ECAN can certainly show value for rates, but make a significant contribution so i think these are important. It would be good to see a more detailed and strategic transport plan for the city.

Especially given that traffic has moved to Rangiora, Hornby, and Selwyn, focusing on moving people in this way is a good idea, the fact of persons relocating here is created a need to commute.

Supporting Economic Development we can also look at supporting canterburys rebuild workers with worker accommodation, smart ones which can then be used for the city as low cost housing when it becomes available (many workers may well stay on and bring families and settle).
