Your submission

Transport

Being a car user and driving to work. I require a further explanation as to your plans to encourage me to stop driving and get the bus and the benefits to me.

Cleaner Air

You should make interest free loans to people to replace old heating. It should not be my responsibility or other rate payers to pay for improvements that you want. Totally disagree with increase of 2.5%. Again what benefit to me that is not explained.

Why am I again being asked to pay for tackling cleaner air in Timaru, Waimate and Geraldine. This should be paid by the rate payers of that area and not form part my rise.

I cannot increase my income by the amount rate rises you propose and think you need to consider the effect you have on residents instead of forcing these increases.

What do you want Environment Canterbury to do?

Reconsider your whole ten year plan and reduce wish list of things you want and what we actually need. No matter how much is spent on transport it will never be good enough or viable to use.

Supply greater details as to what your plans are to encourage people out of cars.

Explain why we are funding areas as far away as Timaru, Geraldine and Waimate, if population is that low in area why so much money needed and why are residents in

these areas not paying.
