Your submission	My concern locally is the quality of south Canterbury rivers,I am under the opinion that tight regulations need to be put in place by Government,in relation to spraying of effluent from dairy farms onto paddocks,and the possible harmful effects of high use of fertilisers,contaminating our rivers.
What do you want Environment Canterbury to do?	With the help of qualified people determine what To clearly identify that this is the cause of our poor river quality. And to support the farmers in finding eco friendly solutions.To put regulations on irrigation quota,effluent spraying on paddocks and use of fertilisers.which are all I believe,harming our rivers and ecosystem.
