Your submission	I propose that Ecan start to perform it's role honestly, on behalf of all New Zealanders, and not be swayed by the greed of Corporates and Property Developers.

What do you want Environment Canterbury to do?

1. Stop deliberately polluting the Waimakariri River via your ongoing support for Silver Fern Farms deliberate corporate discharge of industrial waste.
2. Stop supporting Property Developers to develop housing and industrial complexes on or close to riverbanks, where sediment runoff, toxic runoff and toxic spillages destroy the river habitats (e.g. Silverstream and Kaiapoi Rivers).
3. Stop spraying toxic chemicals on forage food – especially Elderberry Trees: these are marvelous sources of food for humans and birds, yet your staff nuke them everywhere – riverbanks, stopbanks, walkways, cycleways (Waimak, Courtney, Burgess Road...). If personnel at Ecan have a special deal with the toxic chemical suppliers, then please put a stop to such practices. You are supposed to be protecting the natural environment, not destroying it.
4. Stop the gravel extractors from disturbing the river channels, and increasing turbidity in the river, especially during the salmon runs (Oct–May). Some diggers drive right into the river to dig, until their tracks and underwater and their cab is almost flooding. They should be

confined to extracting dry gravels away from the current river channels.

5. Re-instate the democratically elected representatives that the public voted for.
