Support Oppose	
Supports in Part or Opposes in Part	

State concisely whether you support or oppose the provision being submitted on, or wish to have amendments made.

My submission is that: Support Oppose

Please state your reasons for supporting/opposing/amendments sought

My reason(s) for supporting, opposing or requesting amendments to this specific provision are:

The prevailing wind direction in the Buffer Zone area is from the North East.

Most if not all stubble burning takes place in the late summer early autumn months from February till April when conditions are usually dry and stubble fires are of short duration. Also usually a time when fire restrictions are imposed by the Rural Fire Authority.

It appears that Ecan is trying to implement needless bureaucracy when controlling fires in this area when the wind direction is from the North west or South west is all that is required.

Please give precise details for each provision. The more specific you can be the easier it will be for the Council to understand the outcome you are seeking.

I seek the following decisions from Environment Canterbury:

Remove the blanket control over stubble fires in this Buffer zone and only control fires from May till December and only control fires from January till April when the wind direction is from South west through to North west leaving stubble burning a permitted activity when the wind is from the prevailing Easterly direction.

through to North west leaving stubble burning a permitted activity when the wind is from the prevailing Easterly direction.

Please summarise decision requested

Planner - Summary of Decision Requested

Amend rule 7.9 to permit stubble burning when the wind is coming from the prevailing easterly direction, and remove the blanket control over stubble burning inside buffer zones. Only control fires from May until December, and from January until April when the wind direction is from south west through to north west.
