As a general rule make greater allowance for buildings greater than 100 years old or pre 1900 so as not to overburden building owners with costs associated with resource consent and allow for existing installations to remain (but not the instillation of replica or replacement "historical features")

Please give precise details for each provision. The more specific you can be the easier it will be for the Council to understand the outcome you are seeking.

**I seek the following decisions from Environment Canterbury:**

As a general rule make greater allowance for buildings greater than 100 years old or pre 1900 so as not to overburden building owners with costs associated with resource consent and allow for existing installations to remain (but not the instillation of replica or replacement "historical features") Owners of old buildings have enough to contend with maintaining these buiildings. There are not that many (probably less than 100 in Rangiora).

**My submission is that:** . Oppose

*Please state your reasons for supporting/opposing/amendments sought*

**My reason(s) for supporting, opposing or requesting amendments to this specific provision are:**

Rangiora specific, since the introduction of the regulations 5 years ago, most open fires have been removed after the earthquakes and a great number of old wood burners replaced or removed. According to the published statistics this has caused a significant increase in the number of high pollution nights. Of much greater concern is there are now very few options for stand alone heating that can be used in the in case of electricity failure such as in the case of earthquake or extreme weather. Rangiora or parts of normally loose electricity supply when it snows heavily leaving occupiers unable to heat their homes. Pellet fires and Gas don't work without power unless specially set up to do so.

Provision should be made for solid fuel cooking appliances to allow for "off grid" living. This also allows for the use of near carbon zero locally produced wood to be used rather than fossil fuels such as oil or gas. This can only be currently done by consent which is unnecessarily costly to home owners and for a limited period. If it is an integral part of the house it should be for the life of the house.

*Please give precise details for each provision. The more specific you can be the easier it will be for the Council to understand the outcome you are seeking.*

**I seek the following decisions from Environment Canterbury:**

the main part of this point is off practical ability to live off grid and ability of home owners to easily heat their home when the electricity supply has failed

**My reason(s) for supporting, opposing or requesting amendments to this specific provision are:**

Delete clause 2, on greater than 2 ha sites this is not relevant to clean air. Insurance companies might like this and if so they should police this.
