Support Oppose

Supports in Part or Opposes in Part

State concisely whether you support or oppose the provision being submitted on, or wish to have amendments made.

My submission is that: Support Oppose

Please state your reasons for supporting/opposing/amendments sought

My reason(s) for supporting, opposing or requesting amendments to this specific provision are:

I oppose the technical restrictions contained in this rule. It is obvious the writer has not owned or operated a rural block. Further I would like to have May removed from the non burn period as often it is the only month that is more suited to burn off. A total fire ban in summer is common and often extends until the end of April.

Please give precise details for each provision. The more specific you can be the easier it will be for the Council to understand the outcome you are seeking.

I seek the following decisions from Environment Canterbury:

To have sensible and workable statements in any rule that doesn't require applying the cost overheads likely to be associated with this rule. Definitely the removal of May as a restricted period

Support Oppose	
Supports in Part or Opposes in Part	

State concisely whether you support or oppose the provision being submitted on, or wish to have amendments made.

My submission is that: Support Oppose

Please state your reasons for supporting/opposing/amendments sought

My reason(s) for supporting, opposing or requesting amendments to this specific provision are:

I oppose the plan based on the process that has been undertaken to so call consult. Further the process in trying to submit is really only suitable for very literate people with a high degree of computer skills. I don't feel that less than 300 responses from the 2014 consulting period is an adequate measure to base this document on. Your organisation wasn't supported in that round of investigation and I strongly feel this current proposal to put in place the big rule book stick is also going to draw a far greater level of opposition.

Please give precise details for each provision. The more specific you can be the easier it will be for the Council to understand the outcome you are seeking.

I seek the following decisions from Environment Canterbury:

I want this plan to be shelved and I want Ecan to engage with community groups properly, not newspaper advertising and a few public meeting. Your organisation needs to set up real an meaningful discussion with groups who represent the various communities.
