Supports in Part or Opposes in Part

State concisely whether you support or oppose the provision being submitted on, or wish to have amendments made.

My submission is that:

Please give precise details for each provision. The more specific you can be the easier it will be for the Council to understand the outcome you are seeking.

I seek the following decisions from Environment Canterbury:

When it comes to out side burn offs, below are few suggestons.

1. Complete all year round ban on out side burn offs for Rural and Life Style Blocks.

OR

2. Extend the ban on out side burn offs from Residential Properties to Life Style Blocks only, leaving Rural Properties with some wriggle room.

NZ has one of the highest rates of Asthma in the developed world, and I beleive improving our quality would help not just Asthmatics, but everyones Health and Wellbeing would benefit. So in short I favour an year round ban for everyone.

Having said that, rural people would probably kick a big stink. They have to make a living off their land, and a fire may not have an imediate affect on any around them, or very few, as they have hundreds of acres.

So my preferred realistic option is to 'Extend the ban on out side burn offs from Residential Properties to Life Style Blocks only, leaving Rural Properties with some wiggle room.'

With Life style properties greatly increasing in number, and dropping in their individual size, and with more Life Style blocks becoming established, meaning they require more cutting and pruning, there is an intensification of out side burn offs ocuring Life Style Blocks. Something does need to be done to clear the air on that front. Another problem with Life Style blocks surrounding towns, is the residential people have put up with breathing their smoke. I would like to also suggest extending the No Burn Offs within 200m of a Residential Zone, to No Burn Offs within 2km of a Residential Zone.

There is more that I could say or suggest, and am more than happy to help out where I can.

Kind Regards,

Matthew Green

Please summarise decision requested

Planner - Summary of Decision Requested

Insert the following rule:

1. Complete all year round ban on outdoor burning for rural and lifestyle blocks.

Or provide the following appropriate alternative relief relating to outdoor burning:

2. Extend the ban on outdoor burning from residential properties to lifestyle blocks only, and allow rural zoned properties to outdoor burn.
