Thomas Pattinson Palmer	C15C/61207	I support the submission as there is no science valid to force people away from wood burning to keep warm.	Support.
		It is the cheapest heating especially for those who can obtain our fire wood.	
		There is no need to throw away perfectly operating burners.	
		The voters have not been asked about the standards and time lines they are therefore dictatorial and undemocratic.	
		The aspirations of ECan on the clean number of days are unrealistic because of climatic factors in Timaru.	
		People are dying of cold because power cost too much. They need woodburners.
