

Joe Arts 120 Huntsbury Avenue 8022 Christchurch

Proposed Canterbury regional air plan further submission

It is appropriate for vehicle emissions to be managed under a regional plan. Christchurch has a serious air pollution problem and with a 3 tier pollution system of vehicles, wood burners and farm paddock burn off it is unfair to single out homes containing wood burners. In only selecting the issue of wood burners for the Canterbury air plan you are not tackling the matter of serious pollution from vehicles and the inappropriate burn offs all year round on the Canterbury plains.

Received the letter from Buddle Findlay on Monday 13/7/15, with no idea why.

This submission is linked to the previous submission that Joe Arts submitted, the reason it is late is due to receiving the Buddle Findlay letter only this week.

17/7/15

24 July 2015 Conversation with Mr Joe Arts.

I have called Mr Arts to clarify his further submission and he has confirmed that he wishes to register a further submission in support of all of his original submission points and a further submission in opposition to all of the original submission points of Chevron NZ Limited – Sub ID 63218, Mr Arts confirmed that he is happy for me to records this information and add to his further submission as he is unable to put it to me in writing formally
