Further Submissions to Plan Change 4 to the Land and Water Plan

To: The Chief Executive Officer

Canterbury Regional Council

P0 Box 345 Christchurch 8140

Submitter: ANZCO Foods Limited, CMP Canterbury Limited and Five Star Beef

Limited (ANZCO)

- 1. This is a further submission by ANZCO Foods Limited, CMP Canterbury Limited and Five Star Beef Limited (ANZCO) to Plan Change 4 (PC4 of the Land and Water Regional Plan
- ANZCO have an interest in the proposal that is greater than the interest of the general public.
 This is because submissions have been made which, if relief is granted as sought, have the
 potential to positively or adversely impact on the ability of ANZCO to operate their business in
 an efficient and effective manner.
- 3. The table annexed as Appendix A and forming a part of this further submission contains:
 - 3.1 The submissions which ANZCO supports or opposes,
 - 3.2 The particular parts of those submissions supported or opposed,
 - 3.3 Reasons for support or opposition, and
 - 3.4 The decision sought by ANZCO (whether the submission should be allowed or disallowed).
- 4. ANZCO wishes to be heard in support of its further submission.
- 5. If others make a similar submission, ANZCO will consider presenting a joint case with them at a hearing.

Signed on behalf of

ANZCO

17 November 2015

Appendix A: Further Submissions

Please note that the addresses of relevant submitters are contained at the end of this appendix.

| Ref# | ANZCO supports or opposes the submission of: | The particular part of the submission ANZCO supports or opposes is: | The reasons for ANZCO's support or opposition are: | ANZCO seek the following: |
|------|---|---|---|------------------------------------|
| 1 | Canterbury District Health Board #65911 | Policy 4.13 PC4 LWRP-621 | This submission point seeks to retain the addition of 4.13(e)(ii) as notified. As notified Policy 4.13 does not recognise that remedying or mitigating an effect may also be a viable consideration. | Oppose – Disallow submission point |
| 2 | Combined Canterbury Provinces, Federated Farmers of New Zealand #63238 | Policy 4.13 PC4 LWRP-413 | This submission point seeks to retain the addition of 4.13(e)(ii) as notified. As notified Policy 4.13 does not recognise that remedying or mitigating an effect may also be a viable consideration. | Oppose – Disallow submission point |
| | | Region Wide Rules 5.128 PC4 LWRP-459 | If there is no change in the physical nature of the consent (e.g. rate or volume of take) there should be no need to re-assess well interference effects. On this basis the submission is supported. | Support – Allow submission point |
| 3 | Demeter J #52312 | Policy 4.13 PC4 LWRP-374 | This submission point seeks to retain the addition of 4.13(e)(ii) as notified. As notified Policy 4.13 does not recognise that remedying or mitigating an effect may also be a viable consideration. | Oppose – Disallow submission point |
| | | Region Wide Rules 5.91 PC4 LWRP-389 | This submission seeks to include a clause that would indicate the contaminants that are acceptable or unacceptable. This list could end up being extensive and exclusive and would not necessarily improve the interpretation of the rule. | Oppose – Disallow submission point |
| 4 | Fish and Game Council North Canterbury #52310 | Policy 4.13 PC4 LWRP-475 | This submission seeks to remove the second priority wording from Policy 4.13 (ii), and sets an unreasonably high expectation for the management of contaminants and freshwater quality. | Oppose – Disallow submission point |
| 5 | Definition of Wastewater PC4 LWRP-240 | | This submission supports the revised wording of wastewater which will ensure that contaminants from industrial and trade waste processes are assessed under specific and more appropriate rules, rather than the rules relating to on-site wastewater systems. This submission is supported in so far as it supports this differentiation. However, ambiguity exists surrounding the reliance on undefined terms and on this basis the submission is opposed. | Oppose – Disallow submission point |
| 6 | Mackenzie District Council #53929 | Definition of Community Water Supply PC4 LWRP-329 | This submission seeks to delete all changes to community water supply. This does not recognise the importance of the community's reliance on water for uses such as livestock processing. | Oppose – Disallow submission point |
| | | Region Wide Rules 5.115 PC4 LWRP-346 | This submission seeks to delete the wording change of Rule 5.115. This is opposed as notified Schedule 25 assists in clarifying what water uses may occur as a community water supply and provides clarity and guidance for users. | Oppose – Disallow submission point |

| Ref# | ANZCO supports or opposes the submission of: | The particular part of the submission ANZCO supports or opposes is: | The reasons for ANZCO's support or opposition are: | ANZCO seek the following: |
|------|---|---|---|------------------------------------|
| 7 | Oil Companies Z Energy, Mobil and BP #65931 | Definition of Wastewater PC4 LWRP-402 | This submission supports the revised wording of wastewater which will ensure that contaminants from industrial and trade waste processes are assessed under specific and more appropriate rules, rather than the rules relating to on-site wastewater systems. This submission is supported in so far as it supports this differentiation. However, ambiguity exists surrounding the reliance on undefined terms and on this basis the submission is opposed. | Oppose – Disallow submission point |
| | | Policy 4.13 PC4 LWRP-415 | This submission point seeks to retain the addition of 4.13(e)(ii) as notified. As notified Policy 4.13 does not recognise that remedying or mitigating an effect may also be a viable consideration. | Oppose – Disallow submission point |
| | | Region Wide Rules 5.91 PC4 LWRP-422 | This submission supports the removal of wastewater from industrial and trade waste rules. This will improve consistency and avoid duplication. | Support – Allow submission point |
| | | Region Wide Rules 5.92 PC4 LWRP-423 | This submission supports the removal of wastewater from industrial and trade waste rules. This will improve consistency and avoid duplication. | Support – Allow submission point |
| 8 | Rangitata Diversion Race Management Limited #56706 | Policy 4.13 PC4 LWRP-362 | This submission point seeks to retain the addition of 4.13(e)(ii) as notified. As notified Policy 4.13 does not recognise that remedying or mitigating an effect may also be a viable consideration. | Oppose – Disallow submission point |
| 9 | Royal New Zealand Forest and Bird Protection Society #52265 | Policy 4.13 PC4 LWRP-131 | This submission seeks to delete the second priority within Policy 4.13. This sets an unreasonably high expectation for the management of contaminants and freshwater quality. | Oppose – Disallow submission point |
| | | Policy 4.49 PC4 LWRP-276 | This submission seeks to exclude commercial uses from community water supplies, which disregards the use of water by commercial activities providing essential services to the community. | Oppose – Disallow submission point |
| | | Region Wide Rules 5.115 PC4 LWRP-277 | This submission seeks to include consideration of biodiversity within matters for discretion in rule 5.115. This is considered onerous given the rule seeks to control effects on community water supply. | Oppose – Disallow submission point |
| | | Schedule 25 Water Supply Strategy PC4 LWRP-132 | This submission seeks to require that the schedule contain a requirement to assess the environmental effects of the take. This would be undertaken as part of any resource consent required and does not therefore need to be included in the schedule. | Oppose – Disallow submission point |
| 10 | Silver Fern Farms Limited #65900 | Definition of Animal Effluent PC4 LWRP-144 | This submission supports addition of a definition for Animal Effluent and the inclusion of clarification that it does not include incidental animal effluent present in livestock processing waste streams. This assists in creating a clearer plan. | Support – Allow submission point |
| | | Definition of Wastewater PC4 LWRP-145 | This submission supports the revised wording of wastewater which will ensure that contaminants from industrial and trade waste processes are assessed under specific and more appropriate rules, rather than the rules relating to on-site wastewater systems. This submission is supported in so far as it supports this differentiation. However ambiguity exists surrounding the reliance on undefined terms and on this basis the submission is opposed. | Oppose – Disallow submission point |

| Ref# | ANZCO supports or opposes the submission of: | The particular part of the submission ANZCO supports or opposes is: | The reasons for ANZCO's support or opposition are: | ANZCO seek the following: |
|------|--|---|--|--------------------------------------|
| 11 | Horticulture New Zealand #57998 | Schedule 25 PC4 LWRP-623 | The submission seeks that Schedule 25(1) be amended to reduce consumption during water shortages for all uses. However this fails to recognise that livestock processors are essential users of water as farmers destock during droughts and there is an increased demand for livestock processing in water shortages. | Oppose – Disallow submission point |
| 12 | Beef & Lamb New Zealand #52292 | Definition of earthworks PC4 LWRP-193 | The submission point seeks to remove the notified addition that only cultivation on production land established prior to September 2015 be excluded. This would have the unintended consequence of requiring a new resource consent to be obtain for any new cultivation of soil on production land after this date. | Support – Allow the submission point |
