

Tabled @ Hearing 26.11.15

I wish to add to my submission please.

It regards - open, out door rubbish fires (or clean up's).

By mentioning the immense importance of educating people on what to,

and what not to burn on an open fire

I have often smelt the toxic fumes of smoke of near by fires, where polystyrene, Plant Pots, Plastic of all kinds, Rubber, old paint buckets, tyres etc, etc are burnt, causing so much damage to the earth, atmosphere & people. These

People need to be educated on what to & what not to burn & I think a

good fine or penalty imposed on the  
the fires Policed by Council. <sup>would be good.</sup> Then perhaps

they would be more responsible, & think of the earth, atmosphere & people & think

twice at dumping waste on to an open fire & lighting it, doing & causing so much

damage.

thank-you.

Regards from Vanya Mai
