Proposed Plan Change 6.

14 Submission

FURTHER SUBMISSION ON PROPOSED PLAN CHANGE 6 TO THE PROPOSED CANTERBURY LAND AND WATER REGIONAL PLAN UNDER CLAUSE EIGHT OF THE FIRST SCHEDULE TO THE RESOURCE **MANAGEMENT ACT 1991**

Dub ID 66277

To:

Environment Canterbury

PO Box 345

CHRISTCHURCH 8140

mailroom@ecan.govt.nz

Name: Kim STANBURY

Address: 29 CHURCH ROMD

LITTLE PIVER

Post code: 759/

Phone: (03) 325/139

Mobile 0272464764

Email: K.S. STANBURY EXTRA. CO.NZ

I/We make the further submissions on the Proposed Plan Change 6 to the Proposed Canterbury Land and Water Regional Plan (PC6) set out in the attached document.

In accordance with Clause 7 of the First Schedule of the RMA I/we have an interest in the PC6 greater than the interest of the general public. I/we are directly affected by the matters addressed in this further submission.

I/we could not gain an advantage in trade competition through this submission.

I/we would like/not like to be heard in support of its submission

If other persons make a similar submission then I/w would consider presenting joint evidence at the time of the hearing.

X Stanling Signature

Date 8/12/15

FURTHER SUBMISSIONS

ORIGINAL SUBMISSION REFERENCE AND POINT ID	PROVISION	SUBMISSION	SUPPORT OR OPPOSE	REASONS
Sitarz K PC6 LWRP-61	Proposed Plan Change 6, Section 10	Submitter seeks that artificial lake openings be reinstated at mid beach to avoid discharge of canal algae pollutants in the coastal marine area	Support	There is also the need to programme mid beach openings to provide a rapid discharge method for extreme flood events. The existing canal is too small for the discharge rate required in a peak event, and requires two remote end openings in order to function.
Federated Farmers of NZ PC6 LWRP-15	Section 10 Banks Peninsula	Addressing the equitable balancing of cost for the key action projects, including additional fencing required by rules to achieve outcomes specific to this proposal	Support in Part	For small affected holdings in both Rural and Small Settlement zones in the Valley Floor Area, the implications of cost, if not addressed equitably, will put proposed key actions beyond the financial capacity of owners/occupiers. This risks the further fragmentation and abandonment of properties, which is a current issue in the Valley Floor Area.
Wairewa Runanaga Inc. and Te Runanaga O Ngai Tahu PC6 LWRP-101	Section 10 Banks Peninsula	Ensure the naming of the catchment throughout the plan is consistent and reads Te Roto o Wairewa/Lake Forsyth	Support	This name highlights the place and significance of the lake to this area and its people.
Federated Farmers of NZ PC6 LWRP-21	10.4 Policies	Submitter seeks further information about the cost of implementation of the policies and rules (particularly the cost of fencing)	Support	All cost implications need to be examined including fencing, stock water supply, water pumping, storage tanks and bridging. This potentially affects both Rural and Small Settlement zoned land.
Director general of Conservation PC6 LWRP-14	10.4.1 (c)	(c) encouraging the planting of <u>appropriate</u> native species in riparian margins where is compatible with achieving bank stabilization; and	Support	Only consider plant species that won't impede river flow rates and that will remain stable under elevated flow velocities. Suggest deep rooted native grasses and tussocks. Woody plants (rigid stems and/or bushy) are problematic because they individually create resistance to flow, and also promote debris accumulation in the channel.

			T	T	
Federated Farmers	10.4.1	Amend Policy 10.4.1 condition (a) as follows:			ibutaries in the Valley Floor Area are convoluted, changeable and
of NZ		(a) excluding stock from the bed and riparian	Part	ma	any are just ephemeral drains or overland flow. Where and how it is
PC6 LWRP-17		margins of the Okana, Okuti and		pra	actical to exclude stock will prove difficult to the point of being
		Takiratawai river, their tributaries, and the		un	realistic. A number of tributaries extend through both Rural and
		lake within the valley Floor Area, in order to		Sm	nall Settlement zoned land and bisect already small titles. In many
		reduce the risk of bank erosion and collapse		cas	ses, exclusion by fencing would be bizarre and unsustainable for a
		and avoid animal effluent entering water;		nui	umber of reasons. Added to this is the very real risk of stock fencing
		and		bed	ecoming entangled in waterways during flood events, thus
		OR		am	nplifying the hazard.
		(a) excluding stock from the bed and riparian			
		margins of the Okana, Okuti and		Exc	clusion by wholesale prohibition of animals will amount to a severe
		Takiratawai river, and where practical, their		loss	ss of amenity value to owner/occupiers in planning zones that
		tributaries, and the lake within the valley		spe	ecifically permit keeping stock under the rural and rural transition
		Floor Area, in order to reduce the risk of			anning objectives.
		bank erosion and collapse and avoid animal			
		effluent entering water; and			
Federated Farmers	10.4.1 (f)	Clarify how preventing inundation of septic tanks	Support	Thi	is is largely out of the owner/occupiers hands and will need to be
of NZ		with flood waters will be achieved and paid for in		ado	dressed by Christchurch City Council through flood management
PC6 LWRP-19		policy 10.4.1 condition (f)			ogrammes. It implies strategic lake openings prior to or during flood
				eve	ents. It is our understanding that, historically, the old Wairewa and
				Bar	nks Peninsula councils had levied a rate for this purpose and a fund
					as once amassed accordingly.
Herlihy M and M	10.4.1 (a)	Clarify the definition of 'stock' in 10.4.1 (a)	Support	Und	der the existing rules (5.71), 'stock' refers to farmed cattle deer and
PC6 LWRP-83		AND			gs; sheep have not been included as 'stock'.
and		Amend 10.4.1 (a) from 'excluding' stock from the

PC6 LWRP-100		Floor Area to being 'permitted for defined short			e issue of stock management near waterways.
	1	periods pursuant to an acceptable Farm			
		Environment Plan (FEP)'.			

Wairewa	10.4.1	Delete policies 10.4.1 and 10.4.2 and replace with a	Support	1	This is a practical alternative malian walls and the
Runanaga Inc. and	10.4.1	policy that reads:	Зарроге		This is a practical alternative policy wording. We believe that this
Te Runanaga O		Improve water quality in Te Roto o Wairewa/Lake		1	amendment allows both Rural and Small Settlement owner/occupiers
Ngai Tahu					to work towards compliance in a less prescriptive manner. The
		Forsyth to achieve the targets set out in Table 10(e)			proposed policy is consistent with the way in which owners/occupiers
PC6 LWRP-110		and 10(f) by 2030 by:			have established in the Valley Floor Area over time, and meets with
		(a) Reducing the risk of bank erosion or collapse and		- 1	the aspirations of those who live and work in this area.
		associated loss or discharge of sediment into water;			
		(b) Avoiding the direct discharge of animal or human		1	
		effluent into water:			
i i		(c) Encouraging the planting of indigenous			
))		vegetation species in riparian margins where this			
		activity does not adversely affect		1	
		bank stabilization works;			
		(d) Encouraging people to minimize their wastewater			
		discharges and the phosphorous content in their			
		wastewater;			
		(e) Managing on-site effluent treatment and disposal			
		systems in areas prone to inundation; and		-	
		(f) Maintaining current low levels of nitrogen			
		concentrations in freshwater.		-	
Federated Farmers	10.4.3	Amend as follows:	Support	in	Tributaries may be fenced where practical, but there are some real
of NZ			Part	1	limitations as to where this can be done sensibly and sustainably.
PC6 LWRP-20		Improve the flood-carrying capacity of the Okana,		1	and sastaniably.
		Okuti, and Takiratawai rivers and their tributaries by			
		excluding stock from the			
		beds and riparian margins of those rivers,		-	
Herlihy M and M	10.4.3	Submitter states that the policy is technically flawed	Support		A review of influence factors in the main surface water bodies of the
PC6 LWRP-84		and animals are not the critical factor in			Valley Floor Area by a Chartered Professional Engineer concludes that
And		[reducing] flood carrying capacities of rivers - see			stock access to waterways under the current rules (5.68) has a less
Stanbury K		original submission for detail.			then minor impact on flooding. The without reverse (5.68) has a less
STATISTICS IN		original sabilission for detail.			than minor impact on flooding. The critical component for flood

PC6 LWRP-100			•	control is channel congestion through the collective vegetation in riparian margins. Isolated stock access points have very little effect. In this regard, controlled stock grazing may actually be beneficial in keeping the riparian margins sufficiently open to reduce the flooding risk created by impeded flows. Request as a further action to remove the unsubstantiated direct association that is made between 'stock' and 'flooding' in Proposed PC6. This association is erroneous and overreaching.
Wairewa Runanaga Inc. and Te Runanaga O Ngai Tahu PC6 LWRP-112	10.4.3	Amend Policy 10.4.3 to read: Improve the flood-carrying capacity of the Ōkana, Ōkuti and Takiritawai rivers and their tributaries and avoid activities in the beds or margins of these rivers or their tributaries which may significantly reduce their flood carrying capacity by excluding stock from the beds and riparian margins of those rivers, and by enabling bank stabilisation works, so that induced bank erosion and collapse is avoided.	Support	This amendment is workable and much more factual in effect. As noted, PC6 is erroneous with the direct association made between stock and flooding. Furthermore, bank stabilisation works not properly designed and managed will actually increase flooding potential. Currently this clause is promoting a public nuisance by presenting misleading and/or notional ideas on critical flood factors and in the methods for mitigating them. Flooding is a serious, costly issue and invokes concerns addressed by important Government Acts.
Little River Wairewa Flooding Committee PC6 LWRP-128	10.4.3	Amend as follows: Improve the flood-carrying capacity of the Okana, Okuti and Takiritawai rivers and their tributaries managing tree growth and removing tree and debris channel obstructions, by excluding stock from the beds and riparian margins of those rivers, and by enabling bank stabilisation works, so that induced bank erosion and collapse is avoided.	Support in Part	Managing tree growth and the removal of trees and debris channel obstructions is critical for flood mitigation. The activities of stock within the riparian margin are of minor concern to this process.
Wairewa Runanaga Inc. and Te Runanaga O Ngai Tahu	10.5 Rules	Insert a new rule that farming is a permitted activity in the Valley Floor Area provided that a farm environment plan is prepared and implemented by 01 January 2020. The farm environment plan shall:	Support	This is consistent with FEP's as proposed.

PC6 LWRP-137		(i) Identify any potential critical sources of sediment and P loss or erosion on the farm and actions to minimise sediment and P losses; and (ii) Address the management of livestock grazing in proximity to waterways and when crossing waterways to avoid causing or exacerbating bank erosion or the direct discharge of animal effluent into water.			
Federated Farmers	10.5.2	Amend Rule 10.5.2 as follows:	Support	in	Support with the removal of 'tributaries'. This is due to difficulties

and the section of th						available. The term 'surface water' is a departure from the Section 32

			T	
			1	Report and from other parts of PC6 itself, where the correct reference
				is made to 'surface water bodies'.
				The term 'surface water' is also too broad and may be taken to include ephemeral 'overland flow' that occurs in a flood plain catchment that may often encompass the whole Valley Floor Area and extend across three planning zones. The "de minimis non curat lex" apparatus is not satisfactory, being a feudal law approach that gives weak assurance to important amenity values of the many and varied individual owner/occupiers that may collectively be regarded as not trivial.
