To Whom It may concern, Mark and Gill Forrester farm throughout the Waipara Gorge area. We have our own farm plus long term lease blocks. Altogether we farm 1600ha approximately which includes hill country, rolling downs and cultivatable flats. We understand and appreciate Ecan is trying to improve farm management practise and improve water quality. Our submission is on the limit of more than 20ha of winter greenfeed for cattle. This will have serious implications on our current farming programme. We consider we have good farming practise in place. We farm beef cattle and graze dairy cattle over winter. We are suggesting a percentage of the total area farmed eg 10% allowed for winter crop. We wish to be heard on this submission. Mark and Gill Forrester, 1155 Ram Paddock Rd, Amberley.
