

Environmental Consultants Qualified to Perform Work Under the NES

The Resource Management (National Environmental Standard for Assessing and Managing Contaminants in Soil to Protect Human Health) Regulations 2011 (the NES) establishes a requirement that preliminary and detailed site investigations be performed under the direction of and certified by a “suitably qualified and experienced practitioner” (SQEP). The consulting companies listed below have indicated to Environment Canterbury that one or more of their staff is qualified to perform such work under the NES.

Further guidance on SQEPs is available on the Ministry for the Environment’s User’s Guide to the NES at

www.mfe.govt.nz/sites/default/files/guide-nes-for-assessing-managing-contaminants-in-soil.pdf (see in particular section 2.1.1).

Disclaimer

Organisations on this list have indicated to Environment Canterbury that one or more members of the organisation consider themselves to be a Suitably Qualified Experienced Practitioner (SQEP) as that term is used in the Resource Management (National Environmental Standard for Assessing and Managing Contaminants in Soil to Protect Human Health) Regulations 2011 (the NES) and is generally understood by the contaminated land community. The professional credentials of individuals purporting to be SQEPs have

not been independently evaluated or verified by Environment Canterbury and Environment Canterbury does not warrant the competence of or endorse any individuals employed by the listed organisations. This list is not exhaustive and Environment Canterbury does not recommend any one consultant, and makes no judgement about whether the Consultants listed here employ SQEPs, as referenced in the NES. We strongly recommend that Customers discuss the needs of their particular project in detail with one or more of these organisations

(or others not listed) before commissioning their services. Refer to the Yellow Pages for additional Environmental Consultants and Engineers. By accessing this information you agree that Environment Canterbury (including any of its Commissioners, employees, contractors, agents or otherwise) is not liable for any loss of any kind suffered or incurred that arises out of, or is connected to, in any way whatsoever, the use of the information provided, or the instruction of any person or organisation listed.
