Please supply Overseer files (preferably xml files) or an alternative model approved by the Chief Executive of Environment Canterbury for your current or proposed nitrogen loss rate and state the average nitrogen loss rate in kg N/ha/yr for the property below.

Please specify when the OVERSEER® files (or information from a model approved by the Chief Executive of Environment Canterbury that shows the inputs and the amount of nitrogen lost to water) for your Current or Proposed Nitrogen Loss were created or last updated.

Date:

Note: If your current or proposed nitrogen loss is greater than 15kgN/ha/yr then please use Form 509. See Environment Canterbury's Website <http://ecan.govt.nz/services/resource-consents/Pages/forms-booklets.aspx> to obtain this form or call customer services on 0800 324 636 or toll free on 0800 324 636.

Having a Nitrogen Discharge Limit specified you can however future proof your farm in relation to OVERSEER® version change – see explanation below. If you agree to a Nitrogen Discharge Limit it will be audited as one component of your Farm Environment Plan.

Yes No

If yes, please indicate whether you wish to have the Nitrogen Discharge Limit specified as:

15kg nitrogen per hectare per year; or

You're current or proposed nitrogen loss rate as set out in section 6.4.1 above.

Note: OVERSEER® is continually being updated to improve the model and incorporate the latest scientific research. This means that a nitrogen loss calculated using the OVERSEER® can change when new versions are released, even if a farming activity has not changed. Including your current or proposed nitrogen loss rate as your Nitrogen Discharge Limit, means that you will still be compliant if a change in OVERSEER® results in your nitrogen loss exceeding 15 kg/ha as the Nitrogen Discharge Limit will be written so it updates with changes to OVERSEER®.

6.5 Phosphorus Loss Management

If in Section 3, you indicated that you would like to use your Farm Environment Plan to form part of your application, you should have already identified good management practices to minimise the discharge of phosphorus and sediment to water as part of your Farm Environment Plan. Please only complete question 6.6 below if any part of your property or farming enterprise is within the Cultural Landscape/Values Management Area.

7 CONSULTATION

Consultation with all persons potentially affected by your activity prior to lodging your application may result in considerable time and cost savings.

To assist with determining what consultation may be required, please consider the following.

If written approval is obtained from all parties that could be affected by your activity and the effects of your activity are minor, then Environment Canterbury may process your application without public notification.

Have you attached any written approvals obtained?

If written approval cannot be obtained, please suggest ways to reduce the effects on the potentially affected party (mitigation measures).

Non-notified and limited notified applications

For your activity to be considered on a non-notified basis the effects on the environment must be no more than minor and the effects any persons potentially affected by your proposed activity must be less than minor, unless that person has provided their written approval.

If you determine there is any persons potentially affected you may therefore want to consult with them in order to discuss whether they will provide their written approval for your proposal. If you were unable to obtain written approval and Environment Canterbury decided that there were persons affected by your proposal, those parties will be notified of your application (limited notification) and given the opportunity to submit on your application.
