PE172209	Event Assessment	19/09/2016	19/09/2016	11:54					19/9/2016 11:54am CALL BACK REQUESTED. Caller wanted to notify Ecan that the water testing they have had done has returned with a high silica count. Water quality has deteriorated in the past 4-6 months. Concerned this is due to the quarry across the road and a suspected new tailings dam. The caller is happy for someone to come and take a look at their water and see their test results. The latest testing was done on 24th June. The caller asked that they get a follow up to their enquiry. PE172021	Event Assessment	05/09/2016	05/09/2016	11:15					5/9/16 11:15 Complaint about alleged contamination of groundwater by discharge of hazardous waste at the Winston quarry at 325 Old West Coast Road. Caller said a consent has recently been issued which expires in 2017 and they are concerned that water quality is already being adversely affected. They said testing has been done showing elevated levels of E.coli in affected wells. Apparently Environment Canterbury already has copy of the test results. Christchurch West Melton CWMS Zone. PE20152291	Event Closed	15/05/2015	15/05/2015	13:40		Event not Substantiated	Noted	Ongoing monitoring with resource consent conditions	Hi. Caller phoned at 13:40 about the Yaldhurst Road Metals Quarry site where excavating has been occurring for the last two weeks. Caller is a truck driver in and out of the site. This morning at 10:00 (before the rain today) the were there and saw water filling the base of the pit. They believe the quarrying depth has extended into the water table. I know there were applications for deeper quarrying, but has anything been granted yet I'm not sure? And it was only to allow closer proximity rather than extension into the water table anyway I thought. Cheers. PE20150812	Event Closed	06/02/2015	06/02/2015	15:31		Event not Substantiated	Noted		RE Pictures of ground water windstone quarry - This shows a lot of water - maybe this needs checking out, please call for more information		1	WINDSTONE QUARRY	Christchurch City Council	
PE20140166	Event Closed	16/01/2014				Event not Substantiated	Noted		Complaint about huge amounts of dust coming from quarry at cnr Springs and Halswell Junction Rds - last year he noticed there were water trucks but none present currently and with high wind, dust is going everywhere.	CCL CHRISTCHURCH	1	CNR SPRINGS & HALSWELL JUNCTION RDS	Christchurch City Council	
PE20142303	Event Closed	12/06/2014				Event Forwarded to another Agency	Noted		Caller rang because he had been speaking to a Fulton Hogan Driver who works at the Winston Quarry on the corner of Buchanans Road and Old West Coast Road. The driver had informed the caller that the quarry had broken through to groundwater table and continued to be working. Caller is extremely concerned about the environment issues and groundwater quality problems which may come from this. He very much wants to be contacted in regards to this complaint.
