Please tick those that apply I do not wish to be heard in support of my submission

Your submission on the Proposal for the Canterbury Regional Pest Management Plan

Cats should be included in the pest plan. At a minimum feral cats should be included because of the damage they inflict on bird life.

Personally I believe there should be controls in place for domestic cats regarding the maximum number of cats per household and the uncontrolled wandering of these cats. In many places in the world domestic cats are household cats not neighbourhood cats and they live contented lives. Why not also add some controls on Canterbury's domestic cats and give with wildlife in urban areas a chance.

Please add feral cats to the Ecan pest plan.
