Air Quality Support/Oppose

See page 12 of the Consultation Document.

Please select one of the following: I generally agree with the activity proposed for the Air Quality.

Air Quality Comments

Please provide any comments.

- The council should look at subsidizing home heating for homes/dwellings that are off a certain age.
- All state housing and council owned homes should have sufficient heating especially older state homes that are around the Canterbury region.

Freshwater Management Comments

Please provide any comments.

- The Canterbury people should have the right to vote with what happens to our water. For example the recent chlorination of our water regarding the improvement of the city well heads should of had more public representation.
- I support the council to oppose any Government moves to impose mandatory permanent chlorination. The Canterbury people are proud to have untreated water and I believe we need to have the ability to oppose/vote on any changes that may impact this right.
