I know there has been a great support in the service of the 535 bus from rapaki to eastgate as many elderly people in the area use this bus during the day as a quick alternative than having to go into the busy city. Elderly who are still able to walk to the bus but not able to drive rely on this service and appreciate the supportive bus drivers who even help them off the bus.

My mother in law and her friends use it any so do my children. Can we please keep this 535 service going.
