### Public Transport Options

Public Transport is one of the programmes in the Transport and Urban Development portfolio. For the first year of the Long-Term Plan 2018-28 we are proposing changes to the Public Transport programme as outlined in the **Consultation Document**.(on page 14)

To make comment on the Public Transport propped changes please complete the selection panel below.

To make comment on the the whole Transport and Urban Development portfolio, please use the tab on the left.

**Please review the options in the Consultation Document and indicate which option you support:** Option 4 – none of the above. (Please provide comment/ideas for an alternative solution)

### Public Transport Comments

#### Please provide any comments.

Reducing the service you provide and increasing the cost will not increase usage or improve your reputation. To get people to use public transport you need to make it a positive experience, cheaper, faster and/or easier than other options.

You need a better image

Public transport is important for a thriving City if it has to cost CHC more then we need to invest - user pays is not the answer.

Nobody want to change buses to get to there destination you need to make this work better

The old idea of a bus system is not working anymore in 2018. You need a new model maybe a hybrid of your main routes and a uber like system. You need to use the new technologies and innovations

that are available now. tracking apps. stopping on demand, You need to make a quantum change in the way you operate.

The same old solutions will not solve your issues. be bold, innovative, and sell the advantages.
