Subject: LTP SUBMISSION

Good morning

Thank you for the opportunity to submit on the LTP.

In reading the LTP I was unable to find any reference to forestry harvesting. Having experienced down-stream problems from up-stream forestry harvesting, it is my opinion that Ecan needs to have a plan about how forests are harvested; what happens to the off-cut brush; waterway cleanliness and replanting. If possible I would also like to see this extended to encompass the considerable damage caused by the logging trucks both to the roads and verges.

Thank you.
