Public Transport Comments

Please provide any comments.

I agree with reduceing the bus services to locations seldom accessed, but I also think there needs to be a limited service to these 6 routes.

I suggest there needs to be a service to all 6 locations in the following way.

Combine the 106 and the 107 routes and leave the other 4 routes in thier current route. But the now 5 routes have a service leave thier respective hubs at around 8.30ish then go to their destiations and return to thier hubs. And the same be repeated in the afternoon around 3.30ish.

So a total of 2 return trips a day spending around 5 or 6 hours at the location tthey have traveled from the hub to or if catching the bus on the return trip to the hub, 4 or 5 hours to connect to another service and get back to the hub for the afternoon return trip.

Freshwater Management Support/Oppose

See page 6 of the Consultation Document.

Please select one of the following:

I generally agree with the activity proposed for Freshwater Management.

Freshwater Management Comments

Please provide any comments.

I agree that it is vital to reinstate the quality of our water resource. I can not stress enough how important this resource is to the quality of our life.

While Ecan dropped the ball in respect of this issue in the past, there is now the oppurtunity to rectify this problem.

I expect Ecan on my behalf to put this as the number 1 priority.
