### Whole Plan Comments

#### Please provide any comments.

Fresh Water Management Manage it, stop giving it away to high use inappropriate users to pollute our rivers and aquifers. Hazards Risk and Resilience Ensure originators of problems are held accountable: ie tyre disposal - manufacturers, retailers; alumium smelter waste – Comalco; water quality - dairy farmers, councils. Enforce existing laws. Push government for law changes if necessary. Transport and Urban Development-Transport- Keep emphasis on buses and cycle ways.- Promote or at least make provision for commuter rail.- Stop using PR speak (bullshit) when announcing bus route changes. A recent leaflet announcing “improvements” to North Canterbury bus routes buried the cancellation of some Waikuku services under an unrelated heading. Some Kaiapoi residents were also inconvenienced by the “improvements”. You can't please everybody, but don't insult the people you are inconveniencing.- I'm happy for rates to subsidies public transport.-Urban Development Consider the need for market gardening and farming when allowing subdivisions. The increasing population needs more food, not less: ie subdividing marsh lands (Marshlands) which is obviously way more suitable for market gardening; allowing non-productive “lifestyle” blocks on productive farmland.
