Subject: LTP SUBMISSION

Good Evening,

We are opposed to any possible removal of the 107 and 108 buses that might affect the Northwood area. This loss in service will affect the children that rely on it to get to and from school.

As it currently stands there are no bus stops in close proximity to our address and removal of these current options will make public transport from our home out of the question!

The council are continuously encouraging Christchurch residents to get on board with public transport. If our children do not get to experience public transport in their daily routine you cannot expect them to promote this service to future generations in our area.

Kind regards

Craig and Andrea Macdonald
