Long-Term Plan 2018-28

Comments on any other policies or strategies in the Full Draft Long-Term Plan.

Comments.

Throughout the plan there is no consideration in the next ten years for any external review. I would have thought it prudent for a organisation publicly funded with such diverse controversial portfolios to ensure its structures and outputs meet ratepayers and legislative requirements.

Public Transport Options

Public Transport is one of the programmes in the Transport and Urban Development portfolio. For the first year of the Long-Term Plan 2018-28 we are proposing changes to the Public Transport programme as outlined in the **Consultation Document**. (on page 14)

To make comment on the Public Transport proposed changes please complete the selection panel below.

To make comment on the the whole Transport and Urban Development portfolio, please use the tab on the left.

Please review the options in the Consultation Document and indicate which option you support:

Option 1 – A combination of routes, fares and (targeted) rates changes: small fare and rates increases, reduced Total Mobility subsidy and six routes discontinued.

Public Transport Comments

Please provide any comments.

Consider funding and development of car pooling options from outlying towns to cities e.g Pleasant Point to Timaru.

Consider development of multi business freight depots on outskirts of city for distribution and consider charges for those non users. e.g Rolleston to Christchurch.

Education of business to explore car pool strategy with staff.

Consider pilot for 6 discontinued routes using bus infrastructure stops, lane ways. etc as promoting car sharing pickup points along the lines of hitchhiking.

Freshwater Management Support/Oppose	
See page 6 of the Consultation Document.	
Please select one of the following:	I generally agree with the activity proposed for Freshwater Management.
Freshwater Management Comments	

Please provide any comments.

I disagree with the opening comment that water is plentiful in Canterbury and we have an abundance of freshwater.

I consider that more formal networking with NGOs, district councils and Department of Conservation should be established to ensure no duplication of output in portfolios occurs.
