Public Transport Options

Public Transport is one of the programmes in the Transport and Urban Development portfolio. For the first year of the Long-Term Plan 2018-28 we are proposing changes to the Public Transport programme as outlined in the **Consultation Document**. (on page 14)

To make comment on the Public Transport proposed changes please complete the selection panel below.

To make comment on the the whole Transport and Urban Development portfolio, please use the tab on the left.

Please review the options in the Consultation Document and indicate which option you support:

Option 4 – none of the above. (Please provide comment/ideas for an alternative solution)

Public Transport Comments

Please provide any comments.

The 535 is an essential service to the Rapaki and Cass Bay communities because our more remote location makes us a special case.

Residents who can't drive depend on the bus service to get to Lyttelton and Christchurch eg retirees and people with mobility disabilities use it to get to doctors, the bank and shops, teenagers who wish to be independent, people without a licence.

Cyclists depend on it to get through the tunnel. No other area of Christchurch has this problem. The 535 links directly to the Sumner cycleway and makes it possible to cycle in town.

Parking in Lyttelton can be a problem and with only 2 disability car parks in town some locals finds it easier to get the bus and shop locally. If the get in their cars they drive through to town and local shops miss out on their trade.

Freshwater Management Support/Oppose

See page 6 of the Consultation Document.

Please select one of the following: I generally agree with the activity proposed for Freshwater Management.

Freshwater Management Comments

Please provide any comments.

This has to be an area of utmost importance as our whole environment depends on the reversal of the current degradation of our waterways and aquifers. The goals and ideas in the LTP sound like a start but they need "teeth". One full time person to monitor water use or abuse seems inadequate. The intensification of dairy farming and water collection for export in an area of repeated droughts is unsustainable. No further consents should be granted and regulations on use need to be enforced effectively.
